OPTI 202R

Geometrical and Instrumental Optics II (3)

Spring 2019; MWF 8:00-8:50

Meinel Room 307

John E. Greivenkamp

Objective: This course will provide the student with a fundamental understanding of optical system design and instrumentation. The course builds upon the foundations of geometrical optics that were presented in OPTI-201R to discuss a variety of elementary optical systems. Other topics include chromatic effects, camera systems and illumination optics. A special emphasis is placed on the practical aspects of the design of optical systems.

Course Notes: Required and will be made available on the course website. Some of the Notes carry over from OPTI-201R.

Required Text:

Field Guide to Geometrical Optics
081945294-7

J. E. Greivenkamp

Note that this book is available as an e-book through the UA library as well as an app for Android (search "SPIE").

Grading:

Homework	25%	
Attendance/Quizzes	10%	
Midterm Exam I	20%	(late Feb/early March)
Midterm Exam II	20%	(mid-April)
Final Exam	25%	Wednesday May 8 8:00-10:00

The midterm dates have not yet been determined, but will be announced well in advance of the exam dates.

Only a basic scientific calculator may be used for the in-class exams. This calculator must not have programming or graphing capabilities. An acceptable example is the TI-30 calculator. Each student is responsible for obtaining their own calculator.

Please note the final exam date that has been assigned by the University – plan your end of semester travel accordingly as the final exam will not be available prior to this date.

Grading:

A: Excellent – has demonstrated a more than acceptable understanding of the material; exceptional performance; greatly exceeds expectations

B: Good – has demonstrated an acceptable understanding of the material; good performance; meets or exceeds expectations

C: Average – has demonstrated a barely acceptable understanding of the material; adequate performance; meets minimum expectations

D: Poor – has not demonstrated an acceptable understanding of the material; inadequate performance; does not meet expectations

E: Failure – little to no demonstrated understanding of the material; exceptionally weak performance

Quizzes: Quick quizzes will be given during the first 2-3 minutes of random classes throughout the semester. There will be a total of about 15-20 quizzes. The purpose of the quizzes is to monitor basic material understanding as well as to promote on-time class attendance. Please be prepared at every class with a blank sheet of paper (8 ½ x 11) for a potential quiz.

Missed quizzes cannot be made up.

Homework: Homework will be assigned regularly throughout the semester, and it will usually be due in one week. The purpose of the homework is for you to practice the techniques discussed in class or to reinforce this material. Completion of the homework is important to fully master this material. Collaboration and discussion of the homework is encouraged.

Homework is due in the classroom on the assigned day – it may not be turned in early. *Homework must be turned in before the start of class.* A student may only turn in their own homework. No electronic submissions are permitted.

Any homework turned in to the TA will receive zero credit.

Approval for early or late homework must be obtained in advance from the instructor.

Late Homework Policy:

- All late homework must be turned in to the instructor. In the instructor's absence, you may turn in late HW to Cindy Gardner in Room 719. Any HW turned in to the TA will receive zero credit.

- Homework that is turned in after the start of class is considered late.
- Late HW that is turned in on the due date will receive a 20% penalty.
- Late HW that is turned in on the day after the due date will receive a 50% penalty.
- Late HW that is turned in two or more days after the due date will receive no credit.

- Homework must be turned in during normal business hours. Do not slip late HW under the instructor's door.

- When issues arise, please contact the instructor as soon as possible so that we can make appropriate arrangements.

Absence: It is expected that students will regularly attend class and be on time for class. Late arrivals to class are distracting to both the instructor and the other students. Attendance for this class is not specifically part of the course grade (but please note the homework and quiz policies).

In Keeping with University policies:

- All holidays or special events observed by organized religions will be honored for those students who show affiliation with that particular religion.
- Absences pre-approved by the UA Dean of Students (or Dean's designee) will be honored.

Since there is no grade for attendance for this course, these policies would apply primarily to scheduled exams. The instructor must be notified at least one week prior to any such absence so that appropriate accommodations can be made.

Academic Integrity

Students will abide by the University's Student Code of Academic Integrity:

Principle:

Integrity and ethical behavior are expected of every student in all academic work. This Academic Integrity principle stands for honesty in all class work, and ethical conduct in all labs and clinical assignments. This principle is furthered by the student Code of Conduct and disciplinary procedures established by [ABOR Policies 5-308 through 5-404](#) (*see chapter 5*), all provisions of which apply to all University of Arizona students. This Code of Academic Integrity (hereinafter "this Code") is intended to fulfill the requirement imposed by [ABOR Policy 5-403.A.4](#) and otherwise to supplement the Student Code of Conduct as permitted by [ABOR Policy 5-308.C.1](#). This Code of Academic Integrity shall not apply to the Colleges of Law or Medicine, which have their own honor codes and procedures.

Prohibited Conduct:

Students enrolled in academic credit bearing courses are subject to this Code. Conduct prohibited by this Code consists of all forms of academic dishonesty, including, but not limited to:

1. Cheating, fabrication, facilitating academic dishonesty, and plagiarism as set out and defined in the Student Code of Conduct, [ABOR Policy 5-308-E.10, and F.1](#)
2. Submitting an item of academic work that has previously been submitted or simultaneously submitted without fair citation of the original work or authorization by the faculty member supervising the work.
3. Violating required disciplinary and professional ethics rules contained or referenced in the student handbooks (hardcopy or online) of undergraduate or graduate programs, or professional colleges.
4. Violating discipline specific health, safety or ethical requirements to gain any unfair advantage in lab(s) or clinical assignments.
5. Failing to observe rules of academic integrity established by a faculty member for a particular course.
6. Attempting to commit an act prohibited by this Code. Any attempt to commit an act prohibited by these rules shall be subject to sanctions to the same extent as completed acts.
7. Assisting or attempting to assist another to violate this Code.

Student Responsibility:

Students engaging in academic dishonesty diminish their education and bring discredit to the academic community. Students shall not violate the Code of Academic Integrity and shall avoid situations likely to compromise academic integrity. Students shall observe the generally applicable provisions of this Code whether or not faculty members establish special rules of

academic integrity for particular classes. Students are not excused from complying with this Code because of faculty members' failure to prevent cheating.

Faculty Responsibility:

Faculty members shall foster an expectation of academic integrity and shall notify students of their policy for the submission of academic work that has previously been submitted for academic advancement, as well as any special rules of academic integrity or discipline specific ethics established for a particular class or program (e.g., whether a faculty member permits collaboration on coursework; ethical requirements for lab and clinical assignments; etc.), and make every reasonable effort to avoid situations conducive to infractions of this Code.

Student Rights:

Students have the right to a fair consideration of the charges, to see the evidence, and to confidentiality as allowed by law and fairness to other affected persons. Procedures under this Code shall be conducted in a confidential manner, although a student has the right to an advisor in all procedures under this Code. The Dean of Students serves as advisors to students on any questions of process related to this Code.

Further information can be found at <https://deanofstudents.arizona.edu/policies-and-codes/code-academic-integrity>

Misconduct of any kind will be prosecuted and may result in any or all of the following:

- Reduction of grade
- Failing grade
- Referral to the Dean of Students for consideration of additional penalty, i.e., notation on a student's transcript re: academic integrity violation, etc.

It is expected that students observing violations of this code by other students will report these violations to either the Instructor or to the Associate Dean for Academic Programs at the College of Optical Sciences.

Other Policies:

As a courtesy to the instructor and other students in the class, the use of cell phones, pagers, text messaging, personal music devices, etc. is prohibited during class. Computers are to be used only for class-related activities, such as note taking.

Students must abide by all aspects of the University's Student Policies, Procedures and Codes: <https://deanofstudents.arizona.edu/policies-and-codes/code-academic-integrity> Of particular note are the previously mentioned Code of Academic Integrity and the Policy Against Threatening Behavior By Students.

Information contained in this course syllabus, other than the grade and absence policies, may be subject to change with reasonable advance notice, as deemed appropriate by the instructor.

Disability Resource Center:

Students who are registered with the Disability Resource Center must submit appropriate documentation to the instructor if they are requesting reasonable accommodations: <http://drc.arizona.edu/teach/syllabus-statement.html>.

For this course, exams will be administered here at the College of Optical Sciences rather than at the DRC.

Students requesting accommodation must contact the instructor at least three weeks in advance of the scheduled date of any exams. However, the instructor requests that this contact be made early in the semester.

Instructor: John E. Greivenkamp
College of Optical Sciences, Rm. 741
University of Arizona
Tucson, AZ 85721
(520) 621-2942
greiven@arizona.edu

Office Hours: Monday 2:00-3:00

I also maintain an open door policy related to this course. Feel free to knock even if the door is physically closed. If the time is bad, we will set something up. I prefer to see you in person rather than by email!

Course Web Page: <http://wp.optics.arizona.edu/jgreivenkamp/classes/opti-202r/>

Homework solutions will be posted as each homework set is returned. In addition, the site is used for distribution of homework sets, other course materials, additional course notes and corrections, and exam schedules.

Teaching Assistant and Grader:

Owen Anderson
owenanderson@email.arizona.edu

Office Hours:

Monday: 3:00pm - 5:00pm
Tuesday: 3:30pm – 5:30pm
Wednesday: 2:00pm - 4:00pm
Thursday: 3:30pm – 5:30pm

Office hours will be held in the 7th floor discussion area (Optical Sciences West Wing). Also available by email and appointment. Please email to set up an individual appointment.

OPTI 202R Geometrical & Instrumental Optics II (3) Optical instruments, field and relay lenses, telescopes, microscopes, optical materials, achromatization, illumination, cameras, projectors. P, Opt 201

Course Outline – By Week:

Foundations of Geometric Optics

1. Stops and pupils; marginal and chief rays; field of view; Lagrange invariant.
2. Determination of pupil location by Gaussian optics and raytracing; numerical aperture; f-number.
3. Vignetting; real ray traces; afocal systems

Elementary Optical Systems

4. Simple magnifier; magnifying power.
5. Keplerian telescope; eye relief; field lenses; eyepieces; Galilean telescope; mirror systems.
6. Image erection and relay systems; microscopes.
7. Telecentric systems; imaging properties of afocal systems.
8. Eye
9. Camera Systems; depth of focus and field; image quality; photographic systems; viewfinders and focusing aids; autofocus systems; autocollimator; scanners.

Optical Materials and Dispersion

10. Materials; glass properties; Abbe number; other optical materials.
11. Dispersing prisms; minimum deviation; index measurement; thin prisms; combinations of thin prisms; achromatic prism; direct vision prism.

12. Chromatic effects; longitudinal chromatic aberration; thin lens achromat.

Other Optical Systems

13. Radiometric Transfer; $A\Omega$ product; camera equation.

14. Illumination systems; diffuse illumination; projection condenser system; Kohler illumination; critical illumination; slide projector.

15. Light Sources; integrating sphere and bars; practical considerations; dark field and Schlieren systems; overhead projector; Fresnel lenses; optical fabrication techniques; grinding and polishing; spherometer

OPTI 202R Geometrical & Instrumental Optics II (3) Optical instruments, field and relay lenses, telescopes, microscopes, optical materials, achromatization, illumination, cameras, projectors. P, Opt 201

Course Outline – By Note Chapter:

Foundations of Geometric Optics

10. Stops and pupils; marginal and chief rays; field of view; Lagrange invariant.

10A. Determination of pupil location by Gaussian optics and raytracing; numerical aperture; f-number.

11. Vignetting; real ray traces.

12. Afocal Systems
