Special Assignment

Rules of Thumb

Collect your rules of thumb from the semester. Review them, organize, and compile them into a single report. Add new ones as you see fit.

For each of your rules, provide an assessment. On a scale of 1 – 4, how valuable is it:

1. Not useful at all. I only include this to fulfil the stupid requirement
2. Could come in handy. I could look it up if needed.
3. Quite useful for special purposes. This could be very important for special cases, so I should remember it.
4. Very useful. Everybody should know this.

This exercise should help prepare for the final exam in this class.

This is due on Dec. 14. Bring it to the Final Exam. It will be checked and returned to you.
